## SUMMARY

Frontend developer with three years of experience specializing in ReactJS. Possesses excellent communication skills and proficiency in responsive web design. Passionate about usability and possesses working knowledge of Adobe Photoshop and Illustrator.

## SKILLS

**Front End:** JavaScript, TypeScript, ReactJS, NextJS, Sass, Tailwind, HTML5, CSS3, MaterialUI, jQuery

**Back End:** MongoDB, Firebase, MySQL, PHP, Version Control (Git)

**Graphics:** Adobe Photoshop, Adobe Illustrator, Adobe XD, Figma

## EDUCATION

**Bachelor of Arts (B.A.) Digital Media – May 2020**

Hunter College, New York, NY

## EXPERIENCE

### Front End Developer

Jan 2021 – Present

Connectern, New York, NY

- ❖ Creating and styling reusable React components and ensuring proper functionality with backend features such as user authentication, submitting, retrieving, and displaying important user data from relevant databases.
- ❖ Implementing solutions for a streamlined, user-friendly interface with the design team and delivering an engaging user experience through optimization of images, code, and cross browser compatibility.
- ❖ Consulting with 508 Compliance professionals during development to ensure applications are compliant with web accessibility standards.
- ❖ Building responsive pages that work across all modern browsers with 2% market share or greater.

### Front End Developer Intern

Aug 2019 – May 2020

Hunter College, New York, NY

- ❖ Rebuilt Hunter's Film and Media Department's Production Handbook with an updated design which was easier to navigate, update, and facilitated the location of forms used by hundreds of students and staff.
- ❖ Built and managed a site for a Hunter media class that was regularly used by professors and students to post assignments and responses.
- ❖ Identified problems with backend systems uncovered by testing or feedback and correct or referred them to appropriate personnel for correction.
- ❖ Translated UI wireframes and mockups into responsive, interactive pages using HTML, CSS, JavaScript, and WordPress.

## EXTERNAL PROJECTS

### DevJobs

[Demo](#) [Source](#)

- ❖ A job board that allows users to filter through a list of jobs by title, company, location, full time and part time positions and display info on pages generated with dynamic routing. This project was built with a mobile first methodology and allows users to toggle between dark and light themes.
- ❖ Built with **ReactJS**, **React Router**, **React ContextAPI**, **SCSS**

### My World Time

[Demo](#) [Source](#)

- ❖ A web application that displays the time, location and other useful information depending on the user's IP address. Includes a collapsible menu and a light or dark theme depending on the time.
- ❖ Build with **ReactJS**, **TypeScript**, **World Time API**, **IP Geolocation API**, **Quotable API**
